National Enquiry No : **9599330961 & 9599449631**

Test Date in India : **Sunday 29th July 2018**

For Students of Class **V, VI, VII, VIII, IX, X, XI & XII**

Students will be  
Awarded National  
and International  
Rankings

Students will get a clear  
benchmarking of their  
performance vis-a-vis  
International Students

Top performers  
will be Awarded  
GOLD / SILVER /  
BRONZE Medals

**Mathematical Olympiad** competitions are popular among many top, prestigious schools. However, most of these competitions are very challenging and the inexperienced participants usually do not fare well. This leads to them being discouraged from participating in future competitions for fear of failure. In addition, there have been complaints from teachers and parents that the concepts being tested are intricate and beyond the understanding of even the very talented students.

In order to assist the students, SEAMO took the initiative to research for different types of questions to bridge the wide gap. We wanted to provide a platform that would stretch the inexperienced Olympians a little at a time, which would let them experience success and be motivated to move progressively until they reach the level of excellence for other challenging Mathematical Olympiad competitions. After rigorous review, we found a set of questions that are most appropriate for our Students in Southeast Asia.

## MISSION

- To inspire and to embrace enthusiastic young minds to participate and enjoy Mathematical Olympiad.
- To provide resources for students of various levels to hone their problem-solving skills and to prepare them for more challenging Mathematical Competitions.
